VOL. XXIX.

MISCELLANEOUS

ROYAL
BAKING
POWDER
Absolutely Pure.

This powder never varies. A marvel of purity, strength and wholesomeness. More economical than the ordinary kind, and cannot be sold in competition with the manufacture of others. The weight, size and quality of the powder. Sold only by the **ROYAL BAKING POWDER CO.**, 106 Wall street, New York.

THIS THOROUGHBRED STALLION,

NEE BAN!

Is one of the best bred horses in America. His half brother, KING THOMAS, sold at \$40,000, the highest price ever paid for a yearling.

Will stand the season of 1890 at

Franktown, Nevada,
Commencing April 1st and
Ending July 1st.

DESCRIPTION AND PEDIGREE:

JOTTINGS.

People having children in this vicinity should see that they are supplied with the kind of books kept by C. J. Brooks.

The best coffee to be had at E. C. Leadbeater's, and there is where you can get it properly mixed and ground free of charge.

Miss Emma Gibbes is giving lessons in all kinds of fancy crochet or needle work for which she supplies all needed material at the lowest rates.

Save time, money and shoeleather by going to J. J. Becker's Chicago saloon for your most lunches and either Bock or Sacramento beer.

George Becker's Granite saloon is where you will never fail to find a good fire, a palatable lunch and both Pacific and Fredericksburg beer.

As W. R. Chamberlain does not intend to be a candidate for office this fall, he will be able to devote his whole time to the management of the River-side Hotel.

By eating your meals at the Arcade you will always feel that you have had full value for your money, and no matter how early or late you are, you can always find a hot meal.

Blank booklets, single or in full sets, at C. A. Tarragon's news depot, where also is to be found as good an assortment of miscellaneous works as were ever brought to Reno.

The Ability To Bear Pain

Is the test for fortitude among the Indian tribes. But we defy any Cherokee, Sioux or Comanche to endure the twinges of rheumatism without wincing. These indeed are slight at first, but grow in intensity until they become unbearable. No malady is more obstinate in its maturity than that which gives rise to them. The more need, then, of attacking it at the outset. Fortunately some remedies for it are better than others. Bitter, saffron and definitely more effective than colchicum veratrum and mercury, all remedies which might prove destructive to life in a slight degree. Mineral depuratives, also, when not positively mischievous, are far inferior in remedial power to this salutary doticone. It entirely extirpates the bad and impure humors which originate the disease, and enriches as well as cures it. Constipation, liver complaint, dyspepsia and other ailments also give way to it.

On a recent visit to Iowa, Mr. K. Dalton of Luray, Russell Co., Kansas, called at the laboratory of Chamberlain & Co., Des Moines, to show them his six year old boy, whose life has been saved by Chamberlain's "Cough Remedy." The lad, when first seen, was in a very severe attack of croup. Mr. Dalton is certain that it saved his boy's life and is enthusiastic in his praise of the remedy. He says it has an excellent reputation in his vicinity; that farmers come fifteen miles to his store for it and that many of them, like himself, are never without it in their homes. For sale by Shoemaker & Co.

Happy Hoosiers.

Wm Timmons, Postmaster of Idaville, Ind., writes: "Electric Bitters has done more for me than all other medicines combined, for that bad feeling arising from kidney and liver trouble." John Leslie, farmer and stockman of same place, says: "Find the Electric Bitter to be the best Liver and Kidney medicine, made me feel like a new man." J. W. Gardner, hardware merchant, same town, says: "Electric Bitters is just the thing for a man who is all run down and don't care whether he lives or dies; he found new strength good appetite and felt just like he had a new lease on life. Only go, a bottle at Wm. Pinniger's Drug Store, large bottles go and \$1.00.

Remarkable Rescues.

Mrs. Michaela Curtin, Plainfield, Ill., makes the statement that she caught cold, which settled on her lungs, she was treated for a month by her family physician, but grew worse. He told her she was a hopeless victim of consumption and that no medicine could cure her. Her druggist suggested Dr. King's New Discovery for consumption; she bought a bottle and to her delight found herself relieved from first dose. She continued its use after taking ten doses, found herself sound and well, and does her own housework and is as well as she ever was—Free trial bottles of this Great Discovery at Wm. Pinniger's Drug Store, large bottles go and \$1.00.

A Sure Cure for Piles.

Iitching Piles, known by moisture, like perspiration, cause intense itching when warm. This form, as well as blind, bleeding and protruding, yield at once to Dr. Bosanko's Pile remedy, which acts directly on the parts affected, absorbs tumors, alleviates pain, and cures piles, free. Dr. Bosanko, Piqua, O. Sold by S. J. Hodgkinson.

Mr. B. F. Masters, Cashier of Emmitt & Co.'s Bank at Waverly, Ohio, says: "I consider Chamberlain's Cough Remedy the best I have ever used. After using several other kinds, without benefit, I tried it and it quickly cured me, after years of suffering with an obstinate cough and throat trouble." 50 cent bottles for sale by Shoemaker & Co.

Frye's Abitine Cough Balsom—a combination of the gum Abitine, Yerba Santa and Mullen, is guaranteed to cure coughs, colds and all lung diseases. (It contains no opium.) Price 75 cents. Sold by Wm. Pinniger's Drug Store. The great American preparations bear the fac-simile signature of D. F. FAYET.

Advice to Mothers.

Mrs. WINDSOR'S SOOTHING SYRUP should always be used for children teething. It soothes the soreness and irritation to the system and relieves pain to furnish the system with a power to furnish the muscles of head and strength. The best remedy for purifying the blood is Dr. J. H. McLean's Tonic Liver and Kidney Pillots. 25 cents a vial.

MORE ARTESIAN WATER.

Theodore Winters Obtains a Fine Flow in Washoe Valley.

E. J. Wood, who has been superintending Theo. Winters' recent artesian well operations, furnishes the GAZETTE the following particulars concerning the work: The outfit is an ingenious drilling and jetting mechanism, and was manufactured at the American Well Works of Aurora, Ill. The machinery was put in operation last Tuesday morning upon a well about one-fourth of a mile east of the switch at the Winters ranch in Washoe Valley, making for the first day's work 98 feet. Thursday morning at 10 o'clock, having obtained a depth of 20 feet, a fine flow of water was struck, running 15 gallons per minute, and the same day the machinery was moved some three miles and set up at the dairying ranch at Ophir, commencing work at 10 o'clock Friday and making in the part of a day, 98 feet. At 10 o'clock Saturday, at a depth of 122 feet, the drill stopped to touch bottom and a grand flow of 75 gallons per minute came rushing from the three inch outlet.

The strata penetrated in both instances appeared to be successive layers of coarse gravel, sand and quicksand, with very thin streaks of blue clay as the depth increased. Mr. Winters is much elated over his success and will continue the work until he has a convenient supply of water at all needed points on his ranch.

MISS FINLAYSON.

Theatre Her Friends to Some Fine Music at McKissick's Opera House.

McKissick's Opera House was almost to suffocation last night by the friends and neighbors of Miss Flo Finlayson, it having been announced that she would sing at the Congregational Church services held there. Miss Finlayson is on her way from the East to San Francisco with the Bostonian Opera Company, and remained over a day to visit her people. Her voice has improved wonderfully since she went East. She sang last night, "Jerusalem," composed by Henry Parker, Mendelssohn's "But the Lord is Merciful," and "There is a Green Hill Far Away," by Gounod, so sweetly that she filled many eyes with tears. In the higher register her voice is perfect, while the low notes are very sweet and of great depth. She certainly has reason to feel proud of the reception accorded her last evening.

General Powning returned this morning from San Francisco.

Miss Lexie Finlayson accompanied her sister Flora to the Bay this morning.

C. P. Huntington of the Southern Pacific system went west Saturday evening.

George Cutting, traveling for a San Francisco house, returned to Reno yesterday.

Messer Baker and Wines, the Southern Pacific Railroad attorneys, both went to San Francisco Saturday evening.

The services, by the way, were very interesting, and the choir, composed of Mrs. Frank Poor, Miss Jessie Finlayson, R. H. Lindsay and Mr. Evans, with Miss Quaife at the organ, discoursed some excellent music, and the Rev. Mr. Magill preached an interesting Easter sermon.

EASTER SERVICES.

Supper Music by the Episcopal Church Choir, and an Excellent Sermon by the Rector.

Yesterday being Easter, the Episcopal Church was packed full of new spring bonnets and a congregation seldom seen in Reno. The Church was very tastefully decorated with natural flowers, and presented at once a sacred and home-like appearance. The music, under the leadership of Miss Quaife, was charming, and fitted the occasion of the commemoration of the resurrection of Christ. The duty by Miss Quaife (at the organ) and Professor Hillman (violin) was something grand in itself.

The Rector, Rev. Mr. Lucas, delivered an eloquent sermon, taking for his text the twentieth verse of the fifteenth chapter of the First Corinthians, "Christ is risen from the dead."

In the evening the Easter Festival of the Sunday-school was given. The amount contributed by the scholars during Lent amounted to \$113.00, which will be sent to the general missionary fund.

Lieutenant J. A. Hutton of Fort Malvern, accompanied by his brother-in-law, Al Chartz of the *Enterprise*, was in town yesterday.

George Stiles, the Sierra Kidney Cure man and mine host of the Webster Lake Hotel, came up from the Bay yesterday morning. George is a host and knows how to treat his friends at home or abroad.

HUMBOLDT ITERS.

Grass Starting Sheep Shearing High Water, Etc.

The Winnemucca *Silver State* of the 5th inst. says: A correspondent of the *Silver State*, writing from Paradise valley, says that Captain George, the most prominent Plute and highest authority on Indian affairs in the valley, died last Wednesday afternoon. He had ever been the unflinching friend of the whites, and was always quiet and peaceable. The Plutes feel "bad bad" over his death, as they all looked to him for advice in times of trouble. Captain George, being a good Indian, is beyond doubt now basking in the sunshine on the green slopes of the happy hunting grounds.

The feed in the foothills is getting to be excellent for stock, and will be plenty of it this year.

The Humboldt stood eight feet above low water mark at the bridge gauge last evening. It is now bank full where it is unobstructed by dams, and in many places is spreading over the bottoms.

Several dams up the river have been washed out. In some places the water has cut an entirely new channel, leaving the dam high and dry. This is the case at Dunphy's big dam near Argenta.

J. G. Taylor has built corrals and commenced shearing sheep on the west side of the river to-day. He has a force of ten shearers, and he has about 12,000 sheep to shear.

Intends to Resign.

A San Francisco dispatch of the 5th inst. says: Senator Leland Stanford, who arrived here from Washington today, stated in an interview that after remaining in California a month he will return to Washington and from there go to some of the bathing resorts in Germany for the benefit of his health. The Senator also said that he had notified his associates in the Southern Pacific Company to expect his resignation as President of that company. He said his retirement from the Presidency would make no material change, as his interests in the railroad would remain as at the present time.

The Great Metropolis.

Wednesday evening the Rial and Morris company will produce this thrilling melodrama at McKissick's Opera House as it was rendered at the Grand Opera House, San Francisco.

The company bring with them their own scenery and mechanical stage equipments necessary for the production of the drama. Among others of the company are Eleanor Barry, who is a great favorite in California; Harry Bell, a comedian difficult to excel; Clyde Harron, Lorimer Johnson and William Morris, heartily welcomed when they last appeared. The Great Metropolis" claims the attention of the audience the entire evening and must be seen to be appreciated.

Immediate Legislation Needed.

The Times-Review says: The Eureka *Sentinel* claims that Courtney, whom the Curnow brothers were tried for killing, died of intussusception of the bowels. Great God! Is there then no law to punish people who go about intussuscepting men's bowels in that reckless manner.

Local and General Intelligence.

Business is beginning to look up a little.

The County Commissioners are in session to-day.

Read the 50-cent ad. of a road cart and harness for sale.

To day has been windy and disagreeable in every way.

The GAZETTE is sorry to hear that George Russell is confined to his house by sickness.

Whole trainloads of oranges are going east over both the Southern and Central Pacific roads.

Those wishing to purchase a comfortable dwelling in a desirable locality should read the 50-cent column.

If you want your carriage painted or sign retouched, go to T. J. Gardner, over Hymers' stable. Read his ad.

The *Republican* predicts the erection of several new buildings in Truckee this summer.

It is to be hoped that the

GAZETTE

is to be well received.

The Importance of Marriage.

Don't rush into matrimony, girls. Remain single until you are well in the twenties, when body and mind are alike well developed. You can not overestimate the importance of a thorough knowledge of the man whom you desire to marry. Uprightness, fixedness of principle, an unselfish and generous disposition, with good business abilities, should be regarded as indispensable. If a young man is a good son and brother he will make a kind husband, provided you do your part. Do not be won by trifles.

They Didn't Need It.

Old Gentleman (from head of stairs)—"My daughter, I think Mr. Tarrylate and you have burned enough gas for me now." Mr. Tarrylate—"All right, I'll turn it out."

The neatest and most artistic job

work at this office.

STEAMBOATS ON LAND.

Eight Miles of Their Regular Trips to Be Made on Iron Rails.

The long-expected report of the Board of Government Engineers Officers that was to consider the subject of the obstructions to navigation in the Columbia river, between the Bales and Celilo, and devise some method for overcoming them within reasonable limits of expense, has at last been given to the public.

In this project boats are taken from the river at the foot of the Dalles rapids, and are returned to the river at the head of Celilo falls by means of hydraulic lifts, one at each terminus, and are transported over the intermediate distance a little more than eight miles in length by a boat railway.

The lower lift is designed to raise the boats sixty-eight feet at low water and the upper lift forty feet. The distance to which the boats are to be lifted diminish as the water rises. The lift is an adaptation of the hydraulic docks in use for some years at the Union Iron Works in San Francisco. The process is therefore, not experimental. The lower lift consists of sixteen cast-iron cylinders, each thirty-one and one-half inches in diameter and nineteen feet seven inches long, weighing nineteen tons. In these are rams having a full stroke of seventeen feet three inches. They are placed in two rows, forty-six feet apart, the rams in each row being twenty-two and one-half feet between centers. There is a platform or cradle between these rows, supported by chains from the heads of the rams. The chains are so arranged over sheaves as to give the cradle a speed and movement four times that of the rams. A device for regulating the admission of the water in each press so controls the movement of the rams as to maintain them at a uniform speed and the cradle in a horizontal position, notwithstanding any difference in the load on the several rams. The cradle is placed under the boat while in the water. After it is raised to the top of the lift this is removed, and the car on which the boat is to be transported on the railroad is substituted.

The railroad is a double-track ordinary gauge road, the tracks being twenty feet between centers, and the iron weighing ninety pounds to the yard. It is required of the car that it shall transport with safety the loaded boat or barge, and leave sufficient flexibility to pass over the horizontal and vertical curves of the road. The maximum load to be carried is estimated at 600 tons. The platform is 165 feet long by 38 feet wide. The lateral flexibility to enable the car to pass around curves is obtained by the arrangement of the trucks. There are thirty-four four-wheeled trucks placed in two lines of seventeen each.

The weight of the car is 300 tons. The maximum weight is 600 tons, making the total weight of the loaded car 900 tons. The average load per truck is 27½ tons, and per wheel 7 tons. The car, with its load, is propelled on the track by two 50-ton ordinary locomotives.

The boats are 165 feet long and 33 feet beam and 5 feet draught, weighing with cargo 600 tons. The weight of the cradle is 184 tons. The total weight to be raised in the lift is 1,458 tons, and the speed 4½ feet per minute.

The estimated cost of the whole system, with equipment of two cars and four engines, capable of passing eight loads of 600 tons in each direction in twelve hours, including necessary buildings, and 10 per cent, for contingencies, is \$2,690,356. Estimated for improving Three Mile Rapids, \$170,600, making an aggregate of \$2,860,656. It is estimated that a further expenditure of \$716,000 in buildings, cars, engines and side tracks, by so-called "photo-throldolite," while the height attained will be increased in a mechanical way.

HUMOROUS BITS.

BOOK AGENT—"Sir, I have here a book—" Intended Victim—"Sir, I have here a gun." (Exit book agent.)

STINGY rich man, on giving two cents to a beggar—"Now what will you do with it?" Beggar—"That troubles me. I've been so unaccustomed to wealth."

THE Lancet says that the human body can be embalmed so as to insure identification three thousand years after death. That may be so. But who is to do the identification?

A WESTERN clergyman recently announced that he would preach a sermon on "Looking Backward." He kept his word, for he delivered a discourse on Lot's wife to the great congregation that assembled to hear him.

AFTER the jam burglary—Tommy (on the way to figurative execution)—"I've only one last, sad request to make, mamma." The representative of law and order—"What is it, my son?" Tommy—"Please don't use the hair brush with the china medallion set in the back. It's barbarous."

Mrs. HORNBLOWER (has just finished "Looking Backward")—"Why, Christopher, Bellamy doesn't believe in a nation, at all, does he?" Hornblower (buried in his newspaper)—"Oh, yes, he does." Mrs. Hornblower—"But what kind of a nation?" Hornblower—"Combination, of course. Haven't you any brains?"

A WELL-KNOWN mustard manufacturer who is immensely rich was once—so the story goes—asked how it was possible for him to have amassed a fortune out of such a trifling article as mustard. "Ah," he said, with a knowing wink, "it's not the quantity of mustard people eat; it's what they leave on their plates!"

"PARDON me, sir, but I think you are carrying my umbrella. I could swear to that ivory handle anywhere. If I had not recognized it instantly, I should not have presumed to stop you. That carving was done!"—"Spare me the details, please. It is altogether probable that this is your property. I have no particular claim upon it." "Then how did it come to be in your possession?" "It was left in my hall last night by a burglar who got away with most of the family silver." "I—I guess my umbrella was a size larger than that after all."

Some Popular Errors.

It is a favorite paradox of some that the greatest dandies make the bravest soldiers; as many take pleasure in repeating that great men have usually had small persons. These opinions spring from that love of finding or making a wonder, which is one of the most tenacious principles in human nature and is the cause of half the error that exists in the world. The fact seems to be that brave men have been, in general, neither dandies nor slovens, but simply neat and cleanly, though, of course, there are exceptions of both kinds. Great men, also, have been, in general, neither little nor big, though there have been many of both classes. Size has nothing to do with the question; and the middle-sized class has produced the greatest number of geniuses, simply because it is the most numerous—N. Y. Ledger.

The Importance of Marriage.

Don't rush into matrimony, girls. Remain single until you are well in the twenties, when body and mind are alike well developed. You can not overestimate the importance of a thorough knowledge of the man whom you desire to marry. Uprightness, fixedness of principle, an unselfish and generous disposition, with good business abilities, should be regarded as indispensable. If a young man is a good son and brother he will make a kind husband, provided you do your part. Do not be won by trifles.

Mr. Tarrylate—"All right, I'll turn it out."

CONDENSED SCIENCE.

A CURRENT of thirty watts power is sufficient to send a message over an Atlantic cable.

TWO FRENCH dentists extract teeth without pain by spraying the external ear with ether.

PROF. LANGLEY, as a result of experiments as to moon temperatures, taken during an eclipse, concludes that the mean temperature of sunlit lunar soil is not greater above zero C.

EXPERIMENTS have been made in Germany with torpedoes made of paper, loaded with a charge of twenty-five pounds of dynamite and fired by electricity. Very satisfactory results are said to have been obtained.

THE progress of stellar photography is well exemplified in the case of the inner satellites of Uranus, which, although they are among the most difficult of all, have, during the past year, been successfully photographed.

In a startling paper to the Vienna Academy of Science, Theodor Gross has doubted that sulphur is an element, believing, for reasons soon to be given, that it is a compound of carbon with some other as yet undetermined elementary substance.

A CORRESPONDENT of the British Journal of Photography, having found, by a twenty-five minutes' exposure in photographing the moon, that the image travelled nearly the length of his plate during the exposure, suggests that photography might be made the means of measuring the movement of the heavenly bodies.

THE use of nitro-glycerine in cases of emergency instead of alcohol is recommended by an English physician. A drop on the tongue rouses a fainting man and it may restore life in the case of apparent death, as from drowning. It is quickly relieved headache, heartburn and asthma, and strengthened weak pulse in fevers.

MODERN chemistry shows that the medical lore of the ancient herbalists had a much sounder basis than had been imagined. In 1597 water cresses had been recommended for the cure of scurvy and scrofula. Chemists now say that the cress contains sulphur, phosphorus, iodine and iron—substances that are known to be actual antidotes to scurvy.

PROF. POE, of Bridgeport, Conn., has drowned and resuscitated a pet rabbit eleven times, and suffocated it also with the fumes of burning charcoal, and restored it to life. The professor uses a pair of artificial lungs. Artificial respirations produce muscular contraction and expansion, forcing oxygen into the lungs and drawing out the deadly gases.

EXPERIMENTS have demonstrated that the relation between the velocity of a projectile and the resistance offered by the air to its motion differs materially from Newton's theory that the resistance is proportional to the square of the velocity. For velocities which are nearly equal to that of sound in air the proportionate increase of the resistance is much greater than that of the velocity.

FON DETERMINATION OF THE AIR TEMPERATURE AT GREAT HEIGHTS THE BERLIN SOCIETY FOR BALLOONING IS GOING TO TRY A METHOD OF HERR SIEGELS, WHO USES A THERMOMETER WHICH, BY CLOSURE OF AN ELECTRIC CIRCUIT WHEN CERTAIN TEMPERATURES ARE REACHED, GIVES A LIGHT-SIGNAL. SMALL BALLOONS, EACH CONTAINING SUCH A THERMOMETER, WILL BESENT UP BY NIGHT, AND THE LIGHT WILL AFFECT PHOTOGRAPHICALLY A SO-CALLED "PHOTO-THROLDOLITE," WHILE THE HEIGHT ATTAINED WILL BE INDI

CATED IN A MECHANICAL WAY.

THE estimated cost of the whole system, with equipment of two cars and four engines, capable of passing eight loads of 600 tons in each direction in twelve hours, including necessary buildings, and 10 per cent, for contingencies, is \$2,690,356. Estimated for improving Three Mile Rapids, \$170,600, making an aggregate of \$2,860,656.
